Submit his opinion in the matter refd to in H 5.

Reports have been recd from all the authorities who were requested to furnish their opinions on the subject.

On the subject of fencing and the inclusion of a medical officer of the Mining Board in the Sub committee the opinion of all of them is unanimous.

As regards the submission of diary in duplicate to the Health Officer, K.G.F. by the Dairy Inspector who is to look after the Sanitation of the Catchment area, the opinion is divided. The D.C. reports that the District Board are agreeable to the proposal But if only the demands of the

Sir,

In submitting herewith a copy of Proceedings of a Meeting for the Periodical Inspection of Bethamangala Pumping Station, held at Bethamangala on Saturday the 27th instant, for your information, I have the honour to state that the report shows that the supply of filtered water to the Kolar Gold Fields is satisfactory.

2. Before the next quarterly report is sent, it is expected that the sand in all the filters will be completely renewed.

3. As regards the suggestions of the Acting Health Officer, Kolar Gold Fields items 1, 2, and 3 may be approved, but as regards item 4 the cost of fencing will be very heavy and I doubt if any thing is to be gained by it.

4. I also subrit copy of quarterly report dated 28-7-19 as this report is not

1395

not contained in the file received from the late Southern Circle and the file received is incomplete. Orders on para 4 of this report -- are solicited. It is desirable to have a representative of the -- Mining Board represented in the Sub Committee.

I have the honour to be,

S i r,

Your most obedient servant,

31/3/20.

Superintending Engineer,

Sanitary Circle.

SECRETARY'S OFFICE
Perml. No .....
5-APP 1920
MYSORE GOVT. DEPTT.

PROCEEDINGS OF A MEETING FOR THE PERIODICAL INSPECTION OF BETHAMANGALA PUMPING STATION, HELD AT BETHAMANGALA ON SATURDAY 27-3-1920, AT 12 NOON.

PRESENT:- Mr. Muthuswami Dass, Acting Health Officer, Kolar Gold Fields.

Mr. S.A.Ramaswami Iyer, Executive Engineer, Water Supply Division.

ABSENT:- District Medical and Sanitary Officer, Kolar.

1. Stock of fuel and alum were examined and found adequate. The sulphate of alumina is remarkably good in quality. The present issue of alum is about 63 lbs. a day.

2. Engines and pumps are in good order and working smoothly.

3. Water level in the tank is 50 feet 3 inches i.e., 1 foot and 9 inches below the weir.

4. Reports of the periodical analysis of the water show that the water has been uniformly good.

5. Pure water tank is being cleaned up.

6. Estimates are under submission to put in additional settling tanks and metal on ultra violet ray sterilization apparatus to treat the filtered water.

7. The first 3 miles of the main have become weak and corroded. Bursts and leaks are frequent in this section. Some portions of the main have been renewed with new pipes. It is desirable that the rest of the first 3 miles is completely renewed with new cast iron pipes.

8. The station and surrounding are clean and tidy.

The following suggestions were offered by the Health Officer, Kolar Gold Fields.

(1) That the special Sanitary Inspector appointed by Lon-

look after the conservancy of the catchment area be placed under the control of the Health Officer, Kolar Gold Fields, instead of under the District Medical and Sanitary Officer, Kolar.

(2) That the Sub Assistant Surgeon in the P.W.D. Camp Dispensary at Bethamangala be authorised in cases of emergencies such epidemics &c., at Bethamangala or in the villages in the catchment to carry out the instructions of the Health Officer, Kolar Gold -- Fields until the District Medical and Sanitary Officer of Kolar - arrives on the spot and takes matters under his direction.

(3) That the duplicates of the Sanitary Inspector's diaries may be sent to the Health Officer, Kolar Gold Fields.

(4) That cattle may be fenced out of the 150 feet margin above F.S.L.

Camp Bethamangala,
27-3-1920.

To Sanitary Circle.

Rec'd No. ... APR 1920 ... E.E. P.W.I.I.

Inspection Note on Kolar Gold Fields Water Works,

B E T H A M A N G A L A.

Inspected on 24-7-1919.

By Dr. A.K.Pani, Sanitary Commissioner,
" Freeman of the Mining Board.
" Mascarnhas Health Officer, Kolar Gold Fields,
Mr. S.A.Ramaswami Iyer, Executive Engineer, Water--
-Supply Division.

Resolved:-

1. That as the turbidity of the tank water was high that ½ grain more alum may be added to the filters till film is formed afterwards to the coagulation tank itself. The total quantity of alum may be brought up to 4 grains till the present state of turbidity (10 0) continues. That the interval of washing the filters may be kept at the possible maximum. That after a filter is washed, the water therefrom for the 1st 30 minutes or so may be run out and not into the clear water cistern.

2. That steps be taken to clean the pure water tank.

3. That the present coagulating tank seems inadequate and arrangements may be made to test it and if necessary to duplicate it

4. That in the Sub Committee constituted for the periodical examination of the water works and the catchment, it is desirable to have a representative Medical Officer of the Mining Board -- and a request in this behalf may be sent to them.

The present Committee consists of the Health Officer, Kolar Gold Fields, District Medical and Sanitary Officer, Kolar and Executive Engineer, Water Supply Division, as convener. It is very difficult to secure the attendance of the District Medical and Sanitary Officer of Kolar District and for this reason no meeting could be -- held for the last two months. In his place one Medical Officer of the Mining Board, may be proposed.

Rules for the periodical inspection of Bethamangala Water Supply.

- - -

1. The following officers will constitute the Committee for the periodical inspection of the Bethamangala Water Supply:-

(a) The Executive Engineer, Water Supply Division (Convenor)
(b) The Health Officer, Kolar Gold Fields, and
(c) The District Sanitary Officer, Kolar District.

2. The Committee should inspect the Bethamangala Water Works not less than once every three months, the date of visit being previously intimated to the Superintendent of the Water Works or other authority.

3. The condition of sanitation in the villages on the Palar River constituted into a special area for purposes of safe-guarding the purity of the water supply may also be inspected by the Committee as a part of the prescribed periodical inspections.

4. The Committee should examine the records of the jewel filters to see whether the results of bacteriological examination have been uniformly satisfactory and in case the periodical analyses, chemical as well as bacteriological - reveal shortcomings in the standard of purity should endeavour to trace what the causes are that contribute thereto.

5. The alum should be examined to see if it is of the approved quality and is added in correct quantities.

6. The following items should also be noticed by the Committee

(a) Regulation of the rate of filteration and
(b) leakages, if any, in the main and service-pipes - which should be determined by actual testing.

7. A report embodying the results of inspection should be forwarded to the President of the Sanitary Board, Kolar Gold Fields, within 10 days of the inspection, a copy being at the same time sent to the Chief Engineer and to the Sanitary Commissioner.

17

8. The periodical inspection of the sanitation of the special villages on the Palar River will be regulated by the rules framed by the Committee and approved by the President Sanitary Board, Kolar Gold Fields and Deputy Commissioner, Kolar District, and the Sanitary Commissioner.

From

S. CADAMBI, Esq.,

Secretary to the Government of Mysore,

Public Works Department.

To

The Secretary to Government,

Revenue Department, Bangalore.

Sir,

With reference to your letter No.R.13552-4/L.B.85-19-5 dated the 8th June 1920, I have the honour to state that the suggestions of the Acting Health Officer and the Committee appointed for the periodical inspection of the Hethamangala Water Supply, agreed to by the Superintending Engineer, Sanitary Circle, may be accepted by Government.

2. The question of fencing the 150 feet margin above F.S.L. may be dropped for the present, as it is of doubtful advantage and the cost will be very high.

I have the honour to be,

Sir,

Your most obedient servant,

For Secretary to Government,

24-7-20.

Sir,

With reference to your letter No. R. 13552-4 L.B. 85-19-5 dated the 8th June 1920 calling for opinion on some suggestions of the Health Officer and the Committee appointed for periodical inspection of the Bethamangala Water Supply, I have the honour to submit herewith for the information of Government a copy of the District Board's resolution No. 4 arrived at their meeting held on the 12th June 1920. The Board have agreed to the proposal of the Sanitary Board in the matter of the Sanitary Inspector of the special area seeking instructions and advice of the Medical officer of Health, Kolar Gold Fields. The District Medical and Sanitary Officer, Kolar who was consulted in the matter concurs with the views of the Committee and the Sanitary Board. A copy of his letter No .813 dated 2nd June 1920 in the matter is enclosed for kind reference.

The District Board have also agreed that the village of Bethamangala may for the purpose of facilitating the enforcing of the Vaccination and the Epidemic Diseases Rules be included in the Sanitary Board area.

In accordance with these resolutions the Sanitary Inspector will be directed to send duplicates of his diaries to Medical Officer of Health, Kolar Gold Fields, as required by the Sanitary

No. L.F.O.C. 1053/19-20

Re: Opinion on some suggestions of the Health Officerand the Committee appointed for inspection of the Bethamangala water supply. ---

Sanitary Board and to receive and carry out his instructions and advice so far as the sanitation etc.,of Bethamangala is concerned.

As regards the proposal to have a representative Officer of the Mining Board on the Sub Committee in place of the District Sanitary Officer, Kolar, whose attendance is stated to be not possible to secure; I would like to point out that in the original rules framed for the inspection of Bethamangala Water Supply and approved By Government in their order No. 12321-4 L.B. 83-17-36 dated 26.3.19., the District Sanitary Officer,Kolar has been included as one of the three members constituting the Committee.

If as now proposed he is removed from the said Committee there will be no member of the District Board to represent their interests, in the said Committee, I would therefore propose that, instead of removing the District Sanitary Officer he may be retained on the Committee and an additional member may be appointed,so as to have a representative Medical Officer of the Mining Board on the said Committee.

Sir;

With reference to your letter No. R.13552-4 L.B. 85-19-5 dated the 8th June 1920, I have the honor to state as follows:-

(1) and (3) The special Sanitary Inspector appointed to look after the conservancy of the catchment area should continue under the District Medical and Sanitary Officer and the Deputy Commissioner, Kolar District. The question of jurisdiction stands in the way of adopting the change proposed. It would be enough if the Sanitary Inspector is required to submit to the Health Officer, Kolar Gold Fields prompt reports of outbreaks of epidemics in his circle. Duplicate copies of diaries need not be sent.

(4) I agree that the cost of fencing will be very heavy as the catchment area of the tank is extensive on the other hand, hedging if put up, will take a long time to grow.

(4 T of the report). It is desirable to have as proposed, a Medical Officer of the Mining Board, on the Sub Committee. The membership of the District Sanitary Officer, Kolar District, however, cannot be dispensed with so long as under the orders of the Deputy Commissioner he

General No. III

No.

Enclosure No. 3 Nos 3/7

Rev 307

Subject.

Furnishing opinion on certai proposals relating to the periodical inspection of the Kolar Gold Fields, Water supply.

78

he is responsible for the sanitation of villages in the catchment area. Except on very rare occasions, when pressed for time to attend to extensive prevalence of epidemics in the district, the District Sanitary Officer can have no excuse to join in the periodical inspections on the appointed dates.

I have the honor to be,

Sir,

Your most obedient servant.

Offg. Sanitary Commissioner.

ac

Proceedings of the Government of

His Highness the Maharaja of Mysore.

Read

Rules 1 and 2 of the rules issued with G.O.No. 12321-4/L.B. 83-1736 dated 26th March 1919 appointing a Committee for the periodical inspection of Bethmangala water supply and directing the said Committee to submit a quarterly report in the matter.

2. Memo No. 97 dated 17th April 1920 from the Secy. to Govt. P.W.D. submitting for orders, copies of proceedings of meetings of the Committee held at Bethmangala on 24th July 1919 and 27th March ~~1916 and~~ 1920 respectively.

3. The opinions of the Sany. Commr. the Ch. Engineer and the D.C. Kolar District on the several proposals referred to in the proceedings of the Committee.

Order No. R 3099-104. 29. 2. 9. 20.

The Committee referred to in rule 1 read above have made the following suggestions:-

(1) The Special Sanitary Inspector appointed to look after the conservancy of the catchment area be placed under the control of the Health Officer, K. G. F. instead of under the D. M. & S. O. Kolar and that duplicates of his diaries be sent to the former.

(2) ~~The~~ cattle may be ~~placed~~ fenced out of the 150 feet margin.

(3) It is necessary to have on the Committee a representative Medical Officer of the Mining Board in place of the D. ~~H~~ S. O. Kolar District whose attendance is difficult to secure ~~and consequently meetings will have to be put off~~ necessitating postponement.

As regards the first suggestion, Govt. agree with the Sany. Commr. that the Special Sany. Inspector referred to should continue

to work under the D. M. & S. O. and the D. C. Kolar District and that it would be enough if he is required to submit to the Health Officer, K. G. F. prompt reports of outbreaks of epidemics in his circle. Duplicate copies of diaries need not be sent.

2. As the catchment area of the tank is extensive, the question of fencing may be dropped as it is of doubtful advantage and the cost ~~ex~~ will be heavy.

3. The suggestion of the Committee to have a Medical Officer of the Mining Board as an additional member thereof is approved, but the District Sanitary Officer, Kolar District should continue to be a member of the Committee so long as he is responsible for the Sanitation of the villages in the catchment area. In this connection, it is observed that, except on rare occasions when pressed for time to attend to extensive prevalence of epidemics in the District, the District Sanitary Officer can have no excuse not to join in the periodical inspection on the appointed dates.

The Deputy Commissioner, Kolar District is requested to take necessary steps to give effect to the orders above.

Secy. to Govt.
2nd Rev. Deptt.
